clusters), August.....	25c to \$1.00
Honeysuckles (Belgian, native of Oregon,	
Hall's Japan).....	50c to \$1.00

POINTERS ON ROSE PLANTING

The first question asked by rose buyers is: When is the best time to plant them? Roses, shrubs, trees and the like can be planted any time between October 15 and April 1, providing the soil is not too wet nor frozen. The idea of planting only in November and March is absurd in this locality. Plant as early as possible, in well drained soil which will grow good vegetables. Plant budded (grafted) stock so that the union, which is readily seen, is about two inches below the surface of the soil. If any fertilizer is used, put on top of the soil after planting, but by no means in the hole in direct contact with the roots. If you want to beat the other fellow with a good rose hedge, get busy.

No agents employed.

DELIVERY AND TERMS

Send list of your wants. For large orders call at the Nursery by appointment.

No orders delivered for less than \$1.50.

Satisfactory references required, or cash with order. No C. O. D. orders accepted.

Please state if shipments are to be made by freight or express. Stock will be delivered to transportation company in good order; after this it will be at buyer's risk and cost.

Large orders, plants or trees, cannot be shipped by parcel post.

Remittances should be made by draft on Portland, postal money order or express money order, to avoid delay in shipment.

Mistakes should be promptly reported, and if satisfactorily proven will be gladly corrected to the extent of original price paid.

Deliveries are made from about October 15 to April 1, according to weather conditions.

I take all possible care to send stock out true to name, but do not guarantee stock in any shape or manner whatsoever after leaving Nursery in good condition. Results depend largely on the way of planting and care thereafter.

STOCK IS ALL HOME GROWN
